Description

Tom et Léa nous emmènent à la découverte des reptiles, dont certains vivent depuis des millions d'années sur la plupart des continents, aussi bien sur terre que dans l'eau ! Animaux à sang froid, les reptiles ont des écailles et des vertèbres, naissent dans des oeufs, et peuvent vivre jusqu'à cinquante ans ! Les jeunes lecteurs liront de nombreuses infos sur les serpents (cobras, boas, mamba noir...), les lézards (iguanes, monstre de Gila...), les crocodiles (l'alligator, le caïman, gavial...) et les tortues terrestres et marines ! Et ils apprendront que les reptiles sont précieux et qu'il faut les protéger !
